

KIM JULONGBAYAN

AI Automation & Systems Specialist | AI Agents, MCP, n8n, API Integrations

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Software builder with 5+ years of development and 1-2 years of AI automation experience. Sole engineer on a production platform used every workday by 15 people.
- Builds with Claude Code and ChatGPT; authors MCP tools and agent workflows. Live systems and demos at <https://www.kimlj.dev/hub>.

TECHNICAL SKILLS

- AI: Claude Code, Claude API, ChatGPT/OpenAI API, LLM tool use, AI agents, MCP/FastMCP, prompt engineering, JSON validation
- Automation: n8n, Make, Zapier, Power Automate, Google Apps Script, REST APIs, webhooks, Google Sheets API, Telegram
- Development: Python, JavaScript, TypeScript, React, Node.js, Fastify, FastAPI, Supabase/Postgres, SQLite, GitHub, Docker, Linux VPS

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on a timekeeping and billing platform used daily by 15 people across nursing, staff, admins, and the US owner; built the database, API, dashboard, and Chrome extension.
- Built a Claude agent with database and Google Sheets tools; SELECT-only access, read-only transactions, a 500-row cap, and per-question cost tracking.
- Automated billing sync into Google Sheets, filling blank cells and reporting mismatches while preserving manually entered figures.
- Generated timesheet, payroll, and invoice workbooks from one shared calculation; secured records with row-level access controls and encrypted off-site backups.

SELECTED AI AND AUTOMATION SYSTEMS

Cockpit - Agent Development Workflow | JavaScript, Claude Code, Codex

- Built a local, single-user control plane on DeepSeek Harness with a builder agent, automated tests, independent review, fixes, owner approval, and a git checkpoint.

Jarvis Router - Personal MCP Server | Python, FastMCP

- Authored four async MCP tools joining photo, location, and conversation-history stores over REST; registered in Claude Code and used daily.

Jobsift - AI Job Pipeline | Python, OpenAI, n8n

- Built a Gmail/GPT-4o/Sheets/Telegram workflow in n8n, then rebuilt it in Python with filters before AI calls, cross-source deduplication, and separate drafting and claim-verification roles.
- Operates on an Ubuntu VPS with systemd, Google Sheets tracking, Telegram alerts, and daily database copies verified before use.

Shift Ops Console - Workflow Demonstrator | n8n, Make, Zapier, Power Automate

- Built a rules engine and alert/approval workflows for a simulated 100-person workforce across nine timezones; detected 359 of 370 planted anomalies (97%).
- Fixed repeated n8n sheet reads generating 1.6 million items by executing each read once; tested 15 rules against fixtures before importing the workflow.

RecodeAI - AI Website Redesigner | Claude API, TypeScript

- Built a pipeline that crawls a website, analyzes its brand with Claude, generates a redesign, and deploys it to a live URL at <https://recode.kimlj.dev>.

EDUCATION

- Information Technology, AMA Computer College Makati: 3 of 4 years completed; degree not conferred.
