

KIM JULONGBAYAN

React Native / Expo Developer | TypeScript | Supabase and AI Integration

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- {'Mobile and full-stack developer with 5+ years building software end to end': 'React Native and Expo apps, Supabase backends, and LLM integration.'}
- 772 hours and 16,252 prompts in Claude Code across 43 projects (149 active days, as of Sep 2026), counted from session transcripts and published at kimlj.dev.

TECHNICAL SKILLS

- Mobile: React Native, Expo, React Navigation, Reanimated, Zustand, HealthKit, Capacitor (iOS and Android), Codemagic, TestFlight, App Store and Google Play submission
- Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Chrome MV3 | Backend: Node.js, Express, Fastify, REST APIs, WebSockets
- Data: PostgreSQL, Supabase (Postgres, Auth, realtime), Postgres RLS, SQLite, migrations | AI: Claude API, OpenAI GPT-4o, AI agents and tool use, prompt engineering
- Production: Docker, CI/CD, GitHub Actions, Linux VPS, Nginx, Vercel, Git, encrypted off-site backups

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on a production platform for a US healthcare company (TypeScript, Fastify, Supabase/Postgres, a Chrome MV3 extension), used every workday by 15 people: a remote nursing team in the Philippines and the owner in the US.
- Own the Postgres security model across 44 migrations: 35 row-level-security policies, append-only records, and attributed, approved corrections.
- Shipped an AI agent on the Claude API: the model writes SQL, a dedicated read-only Postgres role runs it under a row cap, and every answer records its own token and cost.
- Automated client billing into the owner's Google Sheet via the Sheets API: a scheduled sync fills only blank cells and reports mismatches rather than overwriting typed figures.
- Built the admin dashboard in vanilla JS, 6,000+ lines across seven surfaces, with nurse status streaming in live over Postgres realtime.

Independent Mobile and Full Stack Developer | 2018 - Present

- Built and shipped mobile and web systems end to end: architecture, development, deployment, and maintenance.

PROJECTS

DailyLoad - React Native Fitness App (Private) | React Native, Expo, HealthKit

- React Native app on Expo with HealthKit, React Navigation, Reanimated and Zustand: a readiness engine that reads sleep, HRV and training load to decide the day's session.

WordWarz.io - Real-Time Multiplayer Game (Shipped) | React, Node.js, Socket.IO

- Shipped to the iOS App Store (Word Warz: Royale) and submitted to Google Play (versionCode 4 in review): React and Capacitor over Node.js and Socket.IO.
- 570 players have reached a game across 1,045 matches, 40-70 playing on a given day, grown by word of mouth alone.

Jobsift - Self-Hosted Job Alert and Scoring Pipeline | Python, n8n

- Rewrote an n8n workflow as a self-hosted Python service once it outgrew the platform, with hard filters that run before any AI call so a rejected job never costs one.

OPEN SOURCE CONTRIBUTIONS

- recharts, a charting library with over 27,000 GitHub stars (4 merged, 2026): using the repo's own example conventions to add XAxis height="auto", a connectNulls fix, and a redundant-dispatch fix, each reviewed by a maintainer before landing.
- mastra, an AI agent framework with over 27,000 GitHub stars (1 merged, 2026): agent model-call retries now honor Retry-After instead of retrying straight back into a rate-limited provider.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
