KIM JULONGBAYAN

Web Developer | Technical SEO | AI Integration

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Web developer with 5+ years building software end to end. Hand-codes production sites and runs their technical SEO, from semantic HTML and JSON-LD to Core Web Vitals, and builds AI into both the sites and the workflow behind them.
- 772 hours and 16,252 prompts in Claude Code across 43 projects (149 active days, as of Sep 2026), counted from session transcripts and published at kimlj.dev.

TECHNICAL SKILLS

- Web: HTML, CSS, JavaScript, TypeScript, React, Node.js, Fastify, Tailwind CSS, responsive and accessible layouts
- Technical SEO: semantic HTML and heading hierarchy, JSON-LD structured data, canonical URLs, internal linking, sitemaps, robots.txt and AI-crawler rules, Google Search Console, Bing Webmaster Tools, IndexNow
- Performance: Core Web Vitals, Lighthouse, PageSpeed Insights, critical CSS, lazy loading, responsive images, WebP, cache headers, Vercel CDN
- AI: Claude Code, Codex, Claude API, OpenAI API, DeepSeek, AI agents with tools, MCP servers, n8n
- Testing and infrastructure: Playwright, GitHub Actions, Docker, Linux VPS, Nginx, Git, Supabase and PostgreSQL

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Built and run mdsprosolutions.com by hand (HTML, CSS, JavaScript, no CMS) and its technical SEO: heading hierarchy, JSON-LD for Organization, FAQPage and JobPosting, canonical URLs, sitemap, robots.txt, Search Console, IndexNow.
- Core Web Vitals: critical CSS split out at build, lazy-loaded responsive images, a preloaded hero, year-long caching on fingerprinted files. Local Lighthouse mobile 83 to 93, LCP 3.9 s to 2.6 s, zero layout shift, SEO 100.
- Added an AI chat assistant to the site on the Claude API, answering visitors from a hand-written knowledge file. Given no tools on purpose, and guarded by rate limits, length caps and an hourly spend cap.
- Sole engineer on the internal timekeeping and billing platform (TypeScript, Fastify, Postgres) used every workday by 15 people, with a Claude agent that answers questions from the database through a read-only account.

Independent Web and AI Developer | 2021 - Present

- Built and shipped AI-integrated web, mobile and automation systems end to end: architecture, development, deployment, and maintenance.

PROJECTS

WordWarz.io - Multiplayer Word Game, Browser, iOS and Android | React, Node.js, Socket.IO

- Built its search and AI-search discovery pages: four pages, one per search intent, with direct answers, FAQs, structured data, internal links and AI-crawler rules, plus tracking that tells Google, ChatGPT and Perplexity visitors apart.
- 570 players have reached a game across 1,045 matches, 40 to 70 playing on a given day, by word of mouth alone. Its own Playwright suite plays a real match in CI on every pull request.

Cockpit - AI Agent Workbench (short film made by Claude Code at kimlj.dev/cockpit) | Claude Code, Codex

- My own control plane for AI coding: one agent builds, automated tests check with no AI involved, a second read-only agent reviews in a fixed format and sends problems back, then I approve and a git checkpoint is saved.

Jobsift - Self-Hosted Job Pipeline | Python

- Reads job boards through their own APIs and filters before any AI call. Generates each application's documents from one spec, checks them, and publishes them to a link verified live before sending.

RecodeAI - AI Website Redesigner | Next.js, Claude API

- Crawls a site, analyzes its brand with Claude, generates a redesign and deploys it to a live URL, streamed in real time.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
