

KIM JULONGBAYAN

AI Utilization | Claude, ChatGPT, Prompt Writing and Business Workflows

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Hands-on Claude and ChatGPT user turning broad requests into prompts, work products, and checked results. Documented Claude Code usage since October 2025, published at kimlj.dev.
- Supports a US staffing company remotely with business records, billing, reporting, AI assistants, and website SEO. English C2; based in Quezon City, Philippines.

SKILLS

- AI tools: Claude, ChatGPT, DeepSeek, prompt writing, reusable instructions, independent output review
- Creative outputs: ComfyUI, Stable Diffusion, ControlNet, IPAdapter, batch image generation
- Business support: Google Sheets, Excel reports, research, documentation, website SEO, Gmail, Slack

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | February 2026 - Present

- Built a public AI assistant using a written knowledge file; answers routine questions and routes unresolved requests to a person by email.
- Built a plain-English AI query assistant for hours and pay, with read-only access to business records and per-question cost tracking.
- Maintain the timekeeping and billing platform used every workday by 15 people, from nurses and staff to the US owner.
- Keep the owner's billing Google Sheet synchronized, preserving manual entries and reporting mismatches for review.
- Generate payroll, timesheet, and client-invoice workbooks from one shared calculation so the documents agree to the cent.
- {'Handle on-page and technical SEO': 'keyword-led page titles, headings, structured data, preferred website URLs, sitemap, and search-console setup.'}

Independent Full Stack Developer | 2018 - Present

- Build and operate web applications and automations end to end, including documentation, deployment, monitoring, and ongoing fixes.

PROJECTS

Generative Image Pipelines - ComfyUI Work Samples

- Built a prompt-template batch pipeline that produced 60+ game avatars, with automatic naming, background removal, and file compression.
- Created mannequin-to-product imagery with pose control and consistent character variations across angles and expressions.

Cockpit - Personal AI Workspace on DeepSeek Harness

- Built a local workspace for Claude Code, Codex, and other tools, keeping project sessions, settings, and permissions separate.
- Created a builder-and-reviewer workflow with automated checks, independent review, remediation, and owner approval before saving a checkpoint.

RecodeAI - Claude-Powered Website Redesign

- Built a workflow that reads a website, analyzes its brand with Claude, generates a redesign, and deploys a live result.

WORK SAMPLES

- Demonstrations and project walkthroughs: <https://kimlj.dev/hub>; documented AI usage: <https://kimlj.dev>

EDUCATION

- {'BS Information Technology, AMA Computer College Makati': '3 of 4 years completed; degree not conferred.'}
