Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Tech-focused operations professional supporting a US company remotely every workday. Organizes business data, maintains internal workflows, communicates through clear written updates, and works independently during US hours.
- Combines careful administrative support with a developer's toolkit, using spreadsheets, AI, and automation to keep records accurate and routine work moving without constant supervision.

SKILLS

- Administration and communication: Google Workspace, Gmail, Google Drive, Excel, Slack, document organization, written updates, email workflows
- Research and data: online research, source verification, spreadsheet cleanup, structured records, trackers, reporting dashboards
- AI and productivity: ChatGPT, Claude, DeepSeek, prompt writing, research and drafting support, output verification
- Automation: Zapier, Make, n8n, Power Automate, Google Apps Script, webhooks, scheduled alerts and approvals
- Web and systems: website updates, intake forms, automatic emails, Chrome extensions, Supabase and Postgres databases

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | February 2026 - Present

- Build and maintain the timekeeping and billing system a US nursing staffing company uses every workday, supporting 15 people from nurses and staff to the owner.
- Keep the owner's billing Google Sheet synchronized while preserving anything entered manually, and flag mismatches for human review instead of silently replacing them.
- Generate timesheet, payroll, and client-invoice workbooks from one calculation so every document remains accurate and consistent.
- Maintain website intake forms that route booking requests and nurse applications to the right inbox, reject spam, and send automatic confirmations.
- Built a website assistant that answers routine visitor questions and hands unresolved requests to a person by email.
- Handle sensitive patient and payroll records under access rules, with attributed changes and nightly encrypted backups.

Independent Full Stack Developer | 2018 - Present

- Built and operated web applications, automations, and online services end to end, including deployment, monitoring, documentation, and ongoing fixes.

SELECTED PROJECTS

Shift Ops Console - Operations Workflow Across Six Tools

- Built a simulated 100-person operations workflow using Zapier for urgent Slack alerts, Make for daily digests, n8n for rules, Power Automate for approvals, Google Sheets, and Looker Studio.
- Tested it with 370 known exceptions; it caught 359, and a scoring revision reduced false alarms from 9% to 1%.

Jobsift - Automated Research and Tracking Pipeline

- Collects and organizes job information, removes duplicates, updates a Google Sheet tracker, and sends Telegram alerts. Runs continuously on a server with documented recovery steps.

WordWarz.io - Web and Mobile Product Built Solo

- Built, launched, and maintain a multiplayer word game on the web, App Store, and Google Play, with 570 players since launch and 40 to 70 on a typical day.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
