

KIM JULONGBAYAN

Website Developer | Lead Funnels, Forms and Automations | HTML/CSS/JS, React, Vercel

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- {'Full stack developer with 5+ years building websites and the systems behind them': 'lead funnels, forms, and the automations that move a lead to the right person. Sole engineer on a production platform 15 people use every workday.'}
- 772 hours and 16,252 prompts in Claude Code across 43 projects (149 active days, as of Sep 2026), counted from session transcripts and published at kimlj.dev.

TECHNICAL SKILLS

- Front end: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, responsive and mobile-first layouts, performance and loading speed
- Lead capture and forms: multi-step forms, server-side validation, file upload, spam protection (Cloudflare Turnstile), email notifications, scheduling embeds
- Integrations and automation: Zapier, Make, n8n, webhooks, REST APIs, JSON, OAuth, Google Sheets API, Gmail and IMAP, Slack and Telegram alerts
- Deployment and SEO: Vercel, custom domains, DNS, SSL, CI/CD, GitHub Actions | technical SEO (JSON-LD, canonical URLs, sitemap, robots, Open Graph), analytics and Search Console

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Built and shipped mdsprosolutions.com, the company's marketing site: a nurse application funnel, booking, technical SEO (JSON-LD, canonical URLs, sitemap), security headers and Cloudflare Turnstile bot protection.
- Sole engineer on the production platform behind it (TypeScript, Fastify, Supabase/Postgres, a Chrome MV3 extension), used every workday by 15 people.
- Automated the owner's billing sheet over the Sheets API with Apps Script reporting panels: a sync that fills only blank cells and reports mismatches rather than overwriting typed figures.
- Shipped an AI agent on the Claude API through a read-only Postgres role under a row cap, with per-answer cost tracking.
- Own the Postgres security model across 44 migrations: 35 row-level-security policies, append-only records, and attributed corrections.
- Wrote the platform's decision and edge-case docs so the owner can follow any workflow without me.

Independent Web and Full Stack Developer | 2018 - Present

- Built and shipped websites, web apps and the automations behind them end to end: design, front end, deployment, monitoring and maintenance.

PROJECTS

WordWarz.io - Real-Time Web Game and iOS App (Shipped) | React, Node.js, Socket.IO

- Shipped to the browser and the iOS App Store on a sub-100ms WebSocket backend, with 570 players reached across 1,045 matches and 40-70 playing on a given day.
- Its AI bot engine runs 5-tier ELO matchmaking and an entropy-driven guesser with a constraint solver.

RecodeAI - AI Website Redesigner | Next.js, Claude API

- Chained Claude API pipeline: crawl a site, analyze its brand, generate a redesign, and deploy it to a live URL, streamed in real time.

Shift Ops Console - Automation Across Six Platforms | n8n, Make, Zapier, Power Automate

- Form-to-notification pipeline shape I reuse for leads: a submission is validated, written to a record, then routed by rules to email, Slack and approval steps, with hard filters before any AI call.
- Its detector caught 359 of 370 planted anomalies (97.0%); when I audited the scorer behind that number it was wrong, so I rebuilt it and cut reported false positives from 9% to 1.0%.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
