

KIM JULONGBAYAN

Web and AI Developer | Claude Code | React, Node.js, Python, PostgreSQL

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Developer who builds with Claude Code daily and takes work from the business requirement through testing and deployment. Sole engineer on a production platform 15 people use every workday.
- 834 hours in Claude Code (as of Oct 2026), counted from session transcripts and published at kimlj.dev. Code accepted by others: 5 pull requests merged into recharts (27,000+ stars) and mastra (28,000+ stars), each reviewed by a maintainer.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, HTML, CSS, SQL
- Web: React, Next.js, Node.js, Express, Fastify, Tailwind CSS, Socket.IO, Chrome MV3 extensions
- Data: PostgreSQL, Supabase, row-level security, SQLite, Google Sheets API, Apps Script
- AI: Claude Code, Claude API (Anthropic SDK), OpenAI API, AI agents with tools, prompt engineering, ComfyUI
- Integrations and automation: REST APIs, webhooks, n8n, Make, Zapier, Power Automate, Telegram Bot API, Resend email
- Deployment: Vercel, Docker, Linux VPS, Nginx, Git, GitHub, GitHub Actions

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on the internal timekeeping and billing platform (TypeScript, Fastify, Supabase/Postgres, Chrome extension) used every workday by 15 people: a nursing team working remotely across the Philippines, and the owner in the US.
- Built Ask AI, an agent on the Anthropic SDK with two tools: SQL against a read-only database role with a row cap, and reads from the owner's Google Sheet, with the cost of every question recorded.
- Synced client billing into the owner's Google Sheet: it fills only blank cells and reports mismatches, so figures typed by hand are never overwritten.
- Replaced an editable payroll spreadsheet: clock-ins are stamped by the database, records are append-only, and every correction goes through an approved, attributed trail.
- Built the public site, mdsprosolutions.com, on Vercel: an AI chat assistant on the Claude API with rate and spend limits, and booking and application forms routed by email to sales and HR.

Independent Developer | 2018 - Present

- Built and shipped web, mobile and automation projects end to end: design, code, deployment and upkeep.
- Traced a Windows bug in OpenAI's Codex CLI (127,000+ stars) to two lines of its Rust source. The maintainer credited the trace, and the shipped fix changed those two lines.

PROJECTS

WordWarz.io - Real-Time Multiplayer Word Game | React, Node.js, Socket.IO

- Live in the browser and on the iOS App Store: 570 players have reached a game across 1,045 matches, with 40 to 70 playing on a given day, grown by word of mouth alone.
- AI bot opponents in five skill tiers, and a Playwright suite that plays a real match across two browsers.

Jobsift - Self-Hosted Job Pipeline | Python

- Began as an n8n workflow and was rewritten in Python when it outgrew it: reads job boards' own APIs and email alerts, filters out misfits before any AI call, and alerts on Telegram. Runs 24/7 on a Linux server.

RecodeAI - AI Website Redesigner | Next.js, Claude API

- Crawls a site, analyzes its brand with Claude, generates a redesign and deploys it to a live URL, streamed live to the browser.

Shift Ops Console - Automation Across Platforms | n8n, Make, Zapier

- Workflows for a simulated 100-person workforce, each platform used where it fits: n8n for the rules, Make for daily digests, Zapier for urgent Slack alerts, Power Automate for approvals.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
