

# KIM JULONGBAYAN

AI Agent Developer | Claude Code, Anthropic API, MCP | Python and TypeScript

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

## PROFESSIONAL SUMMARY

---

- AI and automation developer building agentic pipelines in Python and TypeScript, with LLM tool use, prompt chaining and several third-party APIs run as one unattended flow. Sole engineer on a production platform 15 people use daily.
- Claude Code every day: 772 hours and 16,252 prompts across 43 projects (as of Sep 2026). Multi-model setup: ChatGPT Plus for images and orchestration, DeepSeek for audits, Claude Code for code.

## TECHNICAL SKILLS

---

- AI agents and LLM APIs: Claude Code, Anthropic API (tool use, multi-turn), OpenAI API, DeepSeek, structured outputs, prompt chaining, MCP server authoring (FastMCP)
- Generative media: ComfyUI, Stable Diffusion, IPAdapter, ControlNet, batch image pipelines, ChatGPT image generation
- Languages and integration: Python, TypeScript, JavaScript, SQL | async I/O, REST APIs, webhooks, retry and backoff, Google Sheets API, Gmail and IMAP, Telegram Bot API, n8n
- Data and infrastructure: PostgreSQL, Supabase, SQLite, Docker, Linux VPS, Nginx, Vercel, Git

## EXPERIENCE

---

### MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on the timekeeping and billing platform (TypeScript, Fastify, Postgres, Chrome extension) used every workday by 15 people: a nursing team across the Philippines, and the owner in the US.
- Built "Ask AI", an agent on the Anthropic SDK with two tools, one that queries the database and one that reads Google Sheets, so the owner asks in plain English, gets real numbers back, and can ask follow-ups.
- {"Made the agent's database tool safe to hand to a model": 'a read-only role, a read-only transaction and a 500-row cap, plus per-question cost tracking.'}
- A scheduled sync writes billing into the owner's Google Sheet, fills only blank cells and reports mismatches, so a retry never overwrites figures a person typed.

### Independent AI and Automation Developer | 2021 - Present

- Built and shipped AI-integrated web, mobile and automation systems end to end, from design through deployment and maintenance.

## PROJECTS

---

### Jarvis - Personal AI Assistant | Python, MCP

- Async Python MCP server (FastMCP) with four tools that split one question across three self-hosted services over REST and join the answers, used daily from Claude Code.
- Services: Immich for 40,000 photos and videos (CLIP vector search, face clustering, OCR), Dawarich for 2.6M location points, basic-memory for semantic search over 231,450 messages.

### RecodeAI - AI Website Redesigner | Claude API

- Chained Claude pipeline that runs end to end: crawl a site, analyze its brand, generate a redesign and deploy it to a live URL, streamed live with per-model cost estimates.

### Jobsift - Self-Hosted Job Pipeline | Python

- Unattended pipeline across job boards, email alerts, an LLM, Google Sheets and Telegram. Drafting is split into agents that check each other: an extractor, a drafter and a per-claim verifier.

### WordWarz.io - Real-Time Multiplayer Game | React, Node.js, ComfyUI

- 60+ avatars generated by custom ComfyUI pipelines. Live on the web and the iOS App Store, where 570 players have reached a game across 1,045 matches, with 40-70 playing daily.

## OPEN SOURCE CONTRIBUTIONS

---

- Mastra, AI agent framework with about 28,000 stars: model-call retries now honor the provider's Retry-After wait. Recharts, about 27,000 stars: three fixes and features. All reviewed and merged.

## EDUCATION

---

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
