

KIM

Full-Stack Developer | AI Hobbyist

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | <https://github.com/kimlj> | +639615299305

PROFESSIONAL SUMMARY

Detail-oriented Full-Stack Developer with 5+ years of experience in mobile/web development, AI/ML integration, cloud infrastructure, and blockchain applications. Extensive hands-on experience with generative AI tools including LLMs, image generation (Stable Diffusion, ComfyUI), and video generation. Proficient in DevOps practices including Docker containerization, VPS management, and cloud deployment. Strong analytical mindset with expertise in prompt engineering, AI workflow automation, and ensuring output quality.

TECHNICAL SKILLS

AI/ML Tools	Claude, ChatGPT, Stable Diffusion, ComfyUI, Prompt Engineering, LLM APIs
AI Content	Text Generation, Image Generation, Video Generation, AI Workflows
Languages	JavaScript, TypeScript, Python, SQL
Frontend	React, React Native, Next.js, Tailwind CSS
Backend	Node.js, Express, REST APIs, Firebase, PostgreSQL, MySQL
DevOps/Cloud	Docker, Git, GitLab, Google Cloud, DigitalOcean, VPS, Linux
Dev Tools	VS Code, Cursor, Figma, Postman, Terminal/CLI
QA/Testing	Test Case Design, Bug Reporting, Output Validation, Edge Case Analysis

RELEVANT EXPERIENCE

Dashboard Analytics Developer (OJT) — Mining Company

- Developed real-time analytics dashboards for monitoring mining operations and production metrics
- Created data visualization components with SQL queries for KPIs and operational data
- Ensured data accuracy through validation, quality checks, and anomaly detection

E-Commerce Developer (OJT) — Online Retail Platform

- Built and maintained e-commerce platform features including product catalog and checkout flow
- Managed version control with Git/GitLab for collaborative development workflow
- Conducted QA testing and debugged frontend/backend issues across devices

PERSONAL PROJECTS

Fyve: Word Royale — AI-Enhanced Mobile Word Game

- Designed competitive word game integrating AI-generated content and assets
- Implemented AI avatar generation pipeline using ComfyUI and Stable Diffusion workflows
- Deployed backend services on VPS with Docker containerization

AI Content Generation & Automation

- Created AI-powered workflows for text, image, and video content generation
- Built custom ComfyUI pipelines for batch image processing and style consistency
- Evaluated and validated AI outputs for quality, accuracy, and prompt adherence
- Experience with multiple LLMs (Claude, GPT, local models) for various use cases

Crypto DApps & Cloud Infrastructure

- Deployed Solana mining bots on cloud VPS (DigitalOcean, Google Cloud)
- Containerized applications with Docker for consistent deployment environments
- Built automated systems with risk management using SQL databases for tracking

KEY COMPETENCIES

- **AI/LLM Proficiency** — Hands-on experience with prompt engineering, output evaluation, and AI tools
- **DevOps & Cloud** — Docker containerization, VPS management, CI/CD workflows
- **Attention to Detail** — Meticulous in identifying bugs, edge cases, and quality issues
- **Analytical Thinking** — Strong ability to analyze code, data, and AI model behavior
- **Technical Writing** — Clear documentation of requirements and specifications
- **English Proficiency** — Excellent written and verbal communication skills

AVAILABILITY

Available for remote work with flexible schedule. Equipped with reliable internet and professional workstation.
