KIM JULONGBAYAN

Web Assistant | Website Updates, Page Checks, Google Sheets, AI Tools

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Build and maintain live websites for a US business and my own projects. Handle page changes, mobile layouts, forms, publishing, and small fixes with attention to how people use the site.
- Work remotely with a US owner and a Philippine team. Use ChatGPT, Claude, and DeepSeek daily; English C2. Available immediately for part-time work and a paid trial.

SKILLS

- Web: HTML, CSS, JavaScript, React, mobile layouts, content and link updates, Vercel publishing
- Page checks: browser testing, form validation, mobile layout checks, titles, headings, search indexing
- Computer tasks: Google Sheets formulas and cleanup, Excel reports, online research, Gmail, Slack
- AI and automation: ChatGPT, Claude, DeepSeek, Google Apps Script, n8n, Make, Zapier

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | February 2026 - Present

- Built and manage mdsprosolutions.com in HTML, CSS, and JavaScript, including mobile layouts, page titles, headings, search indexing, and publishing on Vercel.
- Connected booking forms to sales and nurse applications to HR, with spam checks and confirmation emails so each request reaches the right inbox.
- Added a website chat assistant that answers visitors' questions and sends unanswered questions to a person by email, with a cap on spending.
- Built and maintain the timekeeping and billing platform used every workday by 15 people across the Philippine team and US owner.
- Keep the billing Google Sheet in sync without overwriting manual entries. Fill blank cells and flag differences for a person to check.
- Generate timesheet, payroll, and invoice Excel workbooks from one shared calculation so the documents agree to the cent.

Independent Full Stack Developer | 2018 - Present

- Build web apps and automations from the first page through publishing and maintenance. Live demos and project walkthroughs at https://kimlj.dev/hub.

PROJECTS

Portfolio and Live Demo Hub

- Designed and coded my portfolio in HTML, CSS, and JavaScript, with phone layouts, light and dark themes, and motion that honors reduced-motion settings.

WordWarz.io - Real-Time Multiplayer Word Game

- Built and run solo, live on the web, the App Store and Google Play. 570 players have reached a game since launch across 1,045 matches, with 40 to 70 playing on a given day.
- Added four search-focused web pages with FAQs, contextual links, and unique titles. Automated browser checks play a real match before changes ship.
- Created 60+ game avatars with an AI image pipeline that removes backgrounds and compresses assets for web delivery.

Jobsift - Automated Research and Tracking

- Built a job tracker that collects listings, filters mismatches, and sends useful results to Google Sheets and Telegram. Runs continuously on a remote server.
- Merges duplicate listings across boards and keeps application stages in a Google Sheet so records stay organized without repeated manual entry.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
