KIM JULONGBAYAN

Full-Stack Developer | Next.js, React, TypeScript | Supabase / PostgreSQL

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Full-stack developer with 3 years of professional experience. Sole engineer on a production platform used every workday by 15 people, with shipped Next.js and React projects.
- Owns relational database design, API integrations, user access and dashboards, deployment, technical SEO and website performance. Project demos: https://www.kimlj.dev/hub

TECHNICAL SKILLS

- Next.js, React, TypeScript, JavaScript, Tailwind CSS | Node.js, Fastify, Express, REST APIs
- Supabase, PostgreSQL, row-level security, SQL migrations | Vercel, Docker, Linux VPS
- Git, GitHub Actions, Playwright | OpenAI API, Claude API, Google Sheets API | Technical SEO

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on the timekeeping, payroll and billing platform used daily by 15 people; built the TypeScript API, Supabase/PostgreSQL database and admin dashboard.
- Maintained 49 SQL migrations and 41 row-level security policies; closed a database access hole that exposed colleagues' billing rates to authenticated staff.
- Built live staff-status updates and approved correction records, with database-stamped clock-ins and a shared calculation for payroll and client invoices.
- Integrated Google Sheets billing sync that fills blank cells and flags mismatches while preserving figures entered by the owner.
- Built and maintains mdsprosolutions.com on Vercel, including server-validated forms, email routing, an AI assistant and technical SEO.
- Improved loading with critical CSS, deferred scripts and responsive images; local mobile Lighthouse rose from 83 to 93, with layout shift remaining at zero.

PROJECTS

RecodeAI - Next.js Website Redesign Tool | https://recode.kimlj.dev

- Built with Next.js, React, TypeScript and Tailwind CSS; analyzes a site, generates a redesign and deploys it to a live URL.
- Integrated the Claude API and streamed progress to the browser while each redesign runs.

WordWarz.io - Web and Mobile Multiplayer Game | https://wordwarz.io

- Shipped a React and Tailwind CSS game with a Node.js/Socket.IO backend; available in the browser, on the App Store and on Google Play.
- Built a Playwright suite that plays a real match across two browser contexts, running in GitHub Actions on pull requests and main pushes.
- Implemented search discovery pages with structured data, unique metadata, internal links, sitemap and acquisition tracking.

Jobsift - Job Filtering and Alert Pipeline | github.com/kimlj/jobsift

- Built a Python pipeline that filters and deduplicates listings before AI scoring, with Google Sheets logging and Telegram alerts; integrated the OpenAI API.

OPEN SOURCE CONTRIBUTIONS

- Recharts (27,000+ GitHub stars): merged TypeScript fixes for axis sizing and stacked charts, reviewed by a maintainer with automated and browser snapshot tests.
- Mastra (29,000+ GitHub stars): merged a fix that respects the provider's Retry-After response when retrying an AI model call.

EDUCATION

- BS Information Technology coursework, AMA Computer College Makati. Completed 3 of 4 years; degree not conferred.
