

KIM JULONGBAYAN

AI and Full Stack Developer | Python, TypeScript | LLM Integration | Production Debugging

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Full stack developer with 5+ years building software and 1-2 years putting AI into real products. Sole engineer on a production platform 15 people use every workday.
- Takes over code others wrote: traced a Windows bug in OpenAI's Codex CLI (127,000+ stars) to two lines of its Rust source, credited by the maintainer; 5 pull requests merged into recharts and mastra.
- 861 hours and 18,091 prompts in Claude Code across 49 projects (as of Oct 2026), counted from session transcripts.

TECHNICAL SKILLS

- Languages and frameworks: Python, TypeScript, JavaScript | React, Next.js, Node.js, Express, Fastify, Tailwind CSS
- AI: Claude API (Anthropic SDK), OpenAI, DeepSeek, agents with tools, prompt design, per-question cost tracking | Claude Code, Codex
- Data and integrations: PostgreSQL, Supabase, row-level security, SQLite | REST APIs, webhooks, Google Sheets API, Resend, Telegram
- Automation: n8n, Make, Zapier, Google Apps Script
- Deploy and operations: Vercel, Docker, Linux VPS, systemd, Nginx, GitHub Actions CI, Playwright

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on the timekeeping and billing platform (TypeScript, Fastify, Supabase/Postgres, Chrome extension) used every workday by 15 people, from the nurses in the Philippines to the owner in the US.
- Built Ask AI on the Claude API: the model writes SQL, a read-only database role runs it under a row cap, and every answer records its token cost.
- Found and closed a row-level-security hole that let any signed-in nurse read every colleague's billed rate, on a path the server's admin check never saw.
- Billing sync into the owner's Google Sheet fills only blank cells and reports mismatches instead of overwriting; nightly encrypted off-site backups.

Independent Developer | 2021 - Present

- Built and shipped web, mobile and AI projects end to end: design, development, deployment and upkeep.

PROJECTS

Open-Source Contributions | recharts, mastra, openai/codex

- 5 pull requests merged into recharts and mastra (27,000+ and 28,000+ stars), each reviewed by a maintainer: chart axis sizing, stacked-area gaps, and Retry-After on model-call retries.
- Diagnosed a Windows bug in OpenAI's Codex CLI to two process-launch lines in its Rust source; the maintainer credited the trace and the shipped fix changed those lines.

Jobsift - Self-Hosted Job Pipeline | Python, Linux VPS

- Runs 24/7 as a systemd service, rebuilt in Python from an n8n workflow once it hit its limits. Found a five-day silent failure in the server logs and a bot token leaking into logs; rotated it and fixed the logging.

Cockpit - AI Build Workspace | DeepSeek Harness

- Claude Code and Codex run side by side: one agent builds, automated checks run, a second read-only agent reviews in a fixed format, and I approve each change.

WordWarz.io - Real-Time Multiplayer Game | React, Node.js, Socket.IO

- On the web, App Store and Google Play: 570 players across 1,045 matches, 40 to 70 on a given day. Playwright end-to-end suite in GitHub Actions beside 584 server tests.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
