KIM JULONGBAYAN

AI Specialist VA | Claude Skills, Workflow Automation, Google Sheets

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Developer supporting a US owner's daily operations through AI tools, automated reporting and reliable business systems. Three years of professional software development and over a year of hands-on AI work.
- Built the system a 15-person team uses every workday. Work directly with the US owner, document processes and help staff use the tools. English at C2. Demos at kimlj.dev/hub.

SKILLS

- AI workflows: Claude, ChatGPT, Claude Code skills, structured prompts, Anthropic and OpenAI APIs
- Automation: n8n, Make, Zapier, Power Automate, Google Apps Script
- Reporting: Google Sheets formulas, data cleanup, billing sync, Excel workbooks, Looker Studio
- Operations: process documentation, onboarding guides, Gmail, Slack, data checks and access controls

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | February 2026 - Present

- Built and maintain the timekeeping and billing system used every workday by all 15 team members, including nurses, staff, admins and the US owner.
- Built an AI helper that answers the owner's questions about hours and pay from company records. Its database account can only read, and each question's cost is tracked.
- Keep the owner's billing Google Sheet synchronized, filling only blank cells and flagging mismatches so manual entries are preserved.
- Built monthly reporting across two companies for profit, cash, unpaid invoices and expenses, checked independently against the underlying records.
- Created an 8-minute narrated onboarding video and written guide covering invitations, clock-ins, corrections and pay so new hires can follow the process.
- Added a website AI assistant that answers from company information and hands unanswered questions to a person by email, with usage and spending limits.
- Generate payroll and invoice workbooks from one shared calculation. Handle sensitive records with access controls, attributed corrections and encrypted backups.

Independent Full Stack Developer | Personal projects, 2021 - Present

- Build and maintain web apps and automations, including reusable Claude Code skills that provide instructions, output formats and checks for recurring work.

PROJECTS

Cockpit - AI Workflow Control Plane

- Built on DeepSeek's open-source runtime. One agent builds, automated tests check, another reviews, and I approve. It's not public yet; live walkthrough available.
- Short film at kimlj.dev/cockpit, made by Claude Code. The film shows the workflow; it is separate from the private application.

Jobsift - AI Job Alert Workflow

- Started in n8n with Gmail, AI scoring, Google Sheets and Telegram. Rebuilt in Python as it grew; runs 24/7 and merges duplicate listings across boards.

Shift Ops Console - Automation Demonstrator

- Built for a simulated 100-person workforce using n8n rules, Zapier alerts, Make digests, Power Automate approvals and Looker Studio reporting.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed; degree not conferred)
