KIM JULONGBAYAN

Full Stack Developer | React, Node.js, TypeScript, PostgreSQL | LLM Integrations

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Full stack developer with 5+ years of on-and-off experience in JavaScript and TypeScript, and 1-2 years building LLM features into real products. Only engineer on two production systems in daily use.
- Delivers complete features alone, from database schema to deployed interface. Five pull requests merged into recharts and mastra (27,000+ stars each), each reviewed by a maintainer.

TECHNICAL SKILLS

- Frontend: React, Next.js, TypeScript, Tailwind CSS, Zustand, Vite, Capacitor, Chrome MV3 extensions
- Backend: Node.js, Express, Fastify, REST APIs, webhooks, Socket.IO, Server-Sent Events, Python, FastAPI
- Data: PostgreSQL, Supabase, row-level security, SQL migrations, SQLite, Prisma
- AI: Claude API, OpenAI API, DeepSeek, prompt design, tool-using agents, spend and rate limits, Claude Code, Codex
- Delivery: Docker, GitHub Actions, Playwright, Vitest, Linux VPS (Ubuntu, systemd, Nginx), Vercel, Google Cloud

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on the timekeeping and billing platform (TypeScript, Node.js/Fastify, Supabase/Postgres, Chrome extension) a US nurse staffing company runs on, used every workday by 15 people.
- Built an Ask AI agent on the Claude API with two tools: SQL against a read-only database account (500-row cap) and the Sheets API, with the cost of every question tracked.
- Designed the Postgres schema across 47 migrations, with per-user access rules in the database; found and closed a hole that let any nurse read colleagues' billed rates.
- Integrated the owner's Google Sheets: a scheduled billing sync fills only blank cells and reports mismatches rather than overwriting typed figures, plus payroll and invoice workbooks.
- Built the company website's public AI assistant, given no tools on purpose and guarded by per-visitor rate limits and an hourly spend cap, with a handoff to a person by email.

Independent Developer | 2021 - Present

- Built and shipped web, mobile and automation systems end to end: architecture, development, deployment and maintenance.

PROJECTS

WordWarz.io - Real-Time Multiplayer Word Game | React, Node.js, Express, Socket.IO

- Live in the browser, the App Store and Google Play: 570 players have reached a game across 1,045 matches, with 40 to 70 playing on a given day. Server runs in Docker on a Linux VPS.
- Playwright suite plays a real two-browser match, run in GitHub Actions on every pull request beside the server's 584 tests.

RecodeAI - AI Website Redesigner | Next.js, TypeScript, Claude API

- Crawls a site, analyzes its brand with Claude, generates a redesign and deploys it to a live URL, with progress streamed to the page as it happens.

Jobsift - Self-Hosted Job Data Pipeline | Python, LLM APIs, Linux VPS

- Pulls listings from job boards' APIs and email alerts, dedups them across sources and filters before any AI call; runs 24/7 as a systemd service, with SQLite, Google Sheets and Telegram.

Cockpit - AI Coding Control Plane | JavaScript, Node.js

- Runs Claude Code and Codex side by side: one agent builds, automated tests verify with no AI involved, a second read-only agent reviews in a fixed format, then I approve and a git checkpoint is saved.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
