KIM JULONGBAYAN

Web Developer | HTML, CSS, JavaScript | Technical SEO and Website Performance

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Web developer with 3 years of professional software development experience. Builds and maintains custom websites and a production business platform used every workday by 15 people.
- Hands-on responsive design, technical SEO, performance diagnosis, API integrations and deployment. Custom-code experience; no professional WordPress, Elementor, Shopify or WooCommerce work.

TECHNICAL SKILLS

- HTML, CSS, JavaScript, TypeScript | React, Next.js, Tailwind CSS | Basic PHP and MySQL coursework
- Technical SEO, Search Console, Lighthouse, structured data, sitemaps | Responsive layouts, Playwright
- Node.js, Fastify, REST APIs, Supabase/PostgreSQL | Vercel, Docker, Linux VPS, Git, GitHub Actions
- Claude Code, Codex, DeepSeek | Claude and OpenAI APIs | Google Sheets API and Apps Script

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Built and maintains mdsprosolutions.com: custom HTML, CSS and JavaScript on Vercel, with responsive layouts and server-validated booking and application forms.
- Implemented email routing and requester confirmations, plus a public AI assistant with request limits, capped spending and human handoff.
- Implemented technical SEO: titles, heading structure, canonical URLs, structured data, sitemap, robots.txt, Search Console and Bing Webmaster Tools.
- Diagnosed delayed headline rendering using the mobile LCP breakdown; moved scripts into the head with defer so the browser discovers them earlier.
- Improved critical CSS, images and script loading; comparable local mobile Lighthouse runs rose from 83 to 93, with LCP falling from 3.9 to 2.6 seconds.
- Sole engineer on the company's timekeeping, payroll and billing platform, used daily by 15 people; owns the database, API, dashboard and encrypted backups.

PROJECTS

Portfolio - Custom Responsive Website | https://www.kimlj.dev

- Designed and built the site directly in HTML, CSS and JavaScript, with responsive project showcases and browser-based animation. Demos: https://www.kimlj.dev/hub

WordWarz.io - Web and Mobile Game | https://wordwarz.io

- Built the React game and Node.js backend, with separate phone, tablet and desktop layouts; shipped to the App Store and Google Play.
- Added discovery pages with metadata, structured data, internal links and acquisition tracking; built a CI-gated Playwright suite for real multiplayer matches.

RecodeAI - Website Redesign Tool | https://recode.kimlj.dev

- Built a Next.js and TypeScript tool that analyzes a website with Claude, generates a redesign and deploys it to a live URL, with progress streamed to the browser.

Cockpit - Personal AI Development Workflow | https://kimlj.dev/cockpit

- Built on DeepSeek Harness: one agent implements, automated checks run, a separate agent reviews, and owner approval precedes a git checkpoint.
- Not public yet; available for a live walkthrough and commit history review. The linked page is a public film made by Claude Code.

EDUCATION

- BS Information Technology coursework, AMA Computer College Makati. Completed 3 of 4 years; degree not conferred.
