

KIM JULONGBAYAN

Web Developer and Designer | Claude Code | Next.js, React | AI Image Pipelines

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Designs and builds websites end to end in code, solo: layout, type, motion, phone layouts, speed and search setup. Live: kimlj.dev, mdsprosolutions.com, wordwarz.io.
- 861 hours and 18,091 prompts in Claude Code across 49 projects (as of Oct 2026), counted from session transcripts and published at kimlj.dev.

TECHNICAL SKILLS

- Web: Next.js, React, Tailwind CSS, hand-written HTML, CSS and JavaScript, Vercel, phone-first layouts, light and dark themes, motion that respects reduced-motion settings
- Site quality: PageSpeed and Lighthouse, accessibility, technical SEO (structured data, sitemaps, Google Search Console, Bing Webmaster Tools), lead forms with confirmation emails
- AI tools: Claude Code, Codex, Claude API, ChatGPT image generation, ComfyUI, Stable Diffusion, ControlNet, IPAdapter
- Also: TypeScript, Python, Node.js, Supabase and Postgres, Docker, Linux VPS, GitHub Actions

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Designed and built the company's public site, mdsprosolutions.com, by hand on Vercel: phone-first heroes, page transitions, PageSpeed 99 desktop and 90 mobile, 100 accessibility, zero layout shift.
- Wired its lead forms (facility bookings to the sales inbox, nurse applications with resumes to HR, each with a confirmation email) and a chat assistant on the Claude API that answers visitors.
- Set up its search presence: keyword-led page titles, structured data for the company, FAQs and job posts, sitemap, Google Search Console and Bing Webmaster Tools.
- Sole engineer on the internal timekeeping and billing platform 15 people use every workday, from the nurses in the Philippines to the owner in the US.

Independent Developer | 2021 - Present

- Built and shipped web, mobile and AI projects end to end: design, development, deployment and upkeep.

PROJECTS

kimlj.dev - Portfolio and Live Demo Hub | HTML, CSS, JavaScript

- Hand-written with no template or framework, built with Claude Code: opens on a 57-second film drawn in the browser from the page's own data, with music made live in the browser; light and dark themes.

WordWarz.io - Multiplayer Word Game | React, Capacitor, Node.js

- Designed solo, with separate phone, tablet and desktop layouts checked by its own Playwright suite. On the web, App Store and Google Play: 570 players across 1,045 matches, 40 to 70 on a given day.
- 60+ character avatars from my own ComfyUI pipeline: prompt templates in, finished assets out, with automatic background removal and WebP compression (90% smaller).

Cockpit - My AI Build Workspace | DeepSeek Harness

- Claude Code and Codex run side by side in one workspace: one agent builds, automated checks run, a second read-only agent reviews in a fixed format, and I approve each change.

RecodeAI - AI Website Redesigner | Next.js, Claude API

- Crawls a site, reads its brand with Claude, generates a redesign and deploys it to a live URL, streamed as it builds.

Generative Image Pipelines | ComfyUI

- Product shots from a mannequin: ControlNet holds the pose while prompts generate outfit variations. IPAdapter keeps one character consistent across poses and angles.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
