KIM JULONGBAYAN

AI-Assisted Operations Support | Records, Reporting & Problem Solving
Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Daily Claude Code and Codex user with significant responsibility for the records and reporting used by a small US healthcare business.
- Careful with discrepancies, exceptions and AI-generated work; uses source records and independent checks before accepting conclusions. English: C2, self-assessed.
- Quezon City, Philippines | Available 40 hours weekly, 9 a.m.-5 p.m. Philippine time | Immediate start | Working demos: kimlj.dev/hub

RELEVANT SKILLS

- Claude Code, Codex, ChatGPT | File/tool context, MCP integrations, independent AI review | Google Sheets, Excel, Looker Studio, written documentation
- Record comparison, exception reporting, payroll/invoice consistency, source verification, root-cause investigation | Remote work with a US owner

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Work directly with the US owner on the timekeeping and billing platform used every workday by 15 people across a remote Philippine team.
- Keep billing records consistent with the source data: the sheet sync fills blanks, preserves manual figures and reports discrepancies for human review.
- Use one calculation for timesheet, payroll and invoice exports so the reports agree to the cent; document decisions and operating procedures.
- Handle clocking edge cases through server-stamped records, last-active-time handling and approved, attributed corrections for ambiguous or missing time.
- Resolved a future pay rate displayed before its effective date by aligning the staff panel with the same dated rate records used for payroll.
- Built intake routing and confirmation emails for bookings and applications; unanswered website-chat questions are handed to a person by email.

AI WORKFLOW & RECORD-QUALITY PROJECTS

Cockpit - Personal AI Work Dashboard | Local, single-user tool

- Use Claude Code and Codex in project-specific sessions; separate implementation, automated checks, independent review, corrections and owner approval.

Jarvis - Personal Information Retrieval

- Built and use a Python MCP router connecting three personal data stores; checked date handling and retrieval quality against original records.

Shift Ops Console - Operations Review Demonstrator | Simulated data

- Built exception queues, severity-based alerts, approvals and reporting for a simulated 100-person workforce; caught 359 of 370 planted anomalies.
- Investigated apparently false alerts and corrected the scorer, reducing the reported false-positive rate from 9% to 1.0%.

Jobsift - Personal Email and Application Tracker

- Maintain an email/job pipeline with Google Sheets application stages, duplicate handling and Telegram alerts; verify source records and AI-generated drafts.

REMOTE WORK SETUP

- Internet speed test, Oct 7, 2026: 183.38 Mbps download / 177.80 Mbps upload. A dated measurement, not a guaranteed minimum.

EDUCATION

- BS Information Technology coursework, AMA Computer College Makati: 3 of 4 years completed; degree not conferred.
