KIM JULONGBAYAN

Full-Stack TypeScript Developer | Next.js, React, PostgreSQL

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Developer with 3 years of professional software development experience. Sole engineer on a production timekeeping and billing platform used every workday by 15 people.
- Daily Claude Code user with over a year of hands-on AI work. Ships changes with automated checks, code review and documented decisions. Demos at kimlj.dev/hub.

TECHNICAL SKILLS

- Web: TypeScript, JavaScript, Next.js, React, Tailwind CSS, Node.js, Fastify, REST APIs
- Data: PostgreSQL, Supabase, schema design, migrations, row-level security; Prisma in Couchproof
- Delivery: Git, GitHub pull requests, GitHub Actions, Vitest, Playwright, Vercel, Docker, Claude Code

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Own the TypeScript and Postgres platform a US nursing staffing company uses for timekeeping, payroll and client billing, supporting a remote Philippine team and the US owner.
- Shipped 48 versioned SQL migrations and database access policies; closed a permissions hole that exposed colleagues' billing rates through direct database requests.
- Built scheduled Google Sheets synchronization that fills blank cells and reports mismatches, preserving manual entries instead of overwriting the owner's records.
- Generate payroll and invoice workbooks from one shared calculation, keeping both consistent when rates change over time.
- Built an independent read-only check that reconciles monthly financial records against pay-period totals and the dashboard, catching disagreements between systems.
- Created a narrated onboarding video and written guide so staff can use the platform without developer assistance.
- Handle sensitive patient information under database access controls, append-only time records, attributed corrections and encrypted off-site backups.

PROJECTS

RecodeAI - AI Website Redesigner | Next.js, React, TypeScript

- Built a Claude-powered pipeline that crawls a site, analyzes its brand, generates a redesign and deploys it, streaming progress to the browser. Live at recode.kimlj.dev.

Cockpit - Agent Development Workspace | DeepSeek Harness

- Built a workflow where an agent implements, automated tests verify, and an independent agent reviews before owner approval and a git checkpoint.
- Not public yet; live walkthrough and commit history available. Claude Code made the short film at kimlj.dev/cockpit.

WordWarz.io - Multiplayer Web and Mobile Game | React, Node.js

- Shipped to the web, App Store and Google Play; built a Playwright suite that plays a real two-browser match against an isolated test database.
- Wired browser checks into GitHub Actions alongside 584 server tests, running on pull requests and pushes to main.

OPEN SOURCE CONTRIBUTIONS

- Mastra (29,000+ stars), merged PR #19906: honored provider Retry-After headers; added Vitest tests with mocked model calls and fake timers for retry timing and fallback behavior.
- Recharts (27,000+ stars), merged PR #7566: fixed gaps across stacked chart series, added regression coverage and regenerated Chromium, Firefox and WebKit visual snapshots.

EDUCATION

- BS Information Technology, AMA Computer College Makati (3 of 4 years completed)
