

KIM JULONGBAYAN

Web Designer and Developer | AI-Assisted Website Builds | Content and Image Review

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305

Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Builds websites and web apps, 5+ years. Most building is now done by guiding AI (772 hours in Claude Code as of Sep 2026) and reviewing what it produces, page by page.
- Sole developer at a US nurse staffing company, including its public website, lead forms and chat assistant.

SKILLS

- AI tools: Claude, ChatGPT, Claude Code, DeepSeek, writing briefs and prompts, checking AI output for accuracy and natural wording
- Web design: layout, typography, mobile-friendly pages, contact and quote forms, Tailwind CSS, HTML, React, Next.js
- Images: AI image generation (ComfyUI, Stable Diffusion), background removal, compression for fast pages
- Tools: Google Docs, Google Sheets, Vercel hosting, Git

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Designed and built mdsprosolutions.com, the company's public website: a "book a call" form to the sales inbox and a job application form to HR, each sending the visitor a confirmation email.
- Added a chat assistant that answers visitors' questions from a written guide about the business; questions it cannot answer go to a person by email.
- Sole developer on the timekeeping and billing system the company runs on, used every workday by 15 people, from the nurses to the owner in the US.
- Automated billing into the owner's Google Sheet without ever overwriting a figure someone typed; mismatches are reported for a person to check.

Independent Web and AI Developer | 2018 - Present

- Built and shipped websites, web apps and AI tools end to end, from design to live launch.

PROJECTS

RecodeAI - AI Website Redesigner | recode.kimlj.dev

- Reads a business's existing website, works out its brand with AI, generates a redesign and puts it live at a new address, with progress shown step by step.

kimlj.dev - Portfolio | kimlj.dev/hub

- Designed and written by me, with live demos of every project at kimlj.dev/hub.

AI Image Pipelines - ComfyUI | Stable Diffusion

- Product shots: kept a mannequin's pose fixed while AI generated realistic outfit variations, with settings tuned per clothing type.
- Character consistency: turned one character drawing into matching poses and angles (front, back, side, expressions).

Jobsift - AI Writing With Checks | Python

- An AI that drafts job applications, where every draft is checked before it goes out: facts against a written record, American spelling, and a list of phrases that sound machine-made or flattering.

WordWarz.io - Multiplayer Word Game | wordwarz.io

- Designed for phone and desktop, on the App Store too: 570 players have reached a game across 1,045 matches, 40 to 70 playing on a given day, grown by word of mouth.
- 60+ character avatars made with an AI image pipeline that removes backgrounds and compresses each file with no manual step.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
