# KIM JULONGBAYAN

Full Stack Developer | React, Next.js, React Native | UI/UX in Code, Claude Code

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

## PROFESSIONAL SUMMARY

- Full-stack developer with 3 years of professional software development experience. Shipped a React app to the web, the App Store and Google Play, and sole engineer on a production platform used every workday by 15 people.
- Designs interfaces directly in code and builds through to the backend and deployment. Daily Claude Code user for about a year, with tests and review before anything ships.

## TECHNICAL SKILLS

- TypeScript, JavaScript, Python | React, Next.js, React Native / Expo, Capacitor, Tailwind CSS, shadcn/ui, Zustand
- Node.js, Fastify, Express, Socket.IO, REST APIs | PostgreSQL, Supabase, row-level security, SQLite
- Docker, Linux VPS, Nginx, Vercel, Git, GitHub Actions, Codemagic, Playwright | Claude Code, Claude API | ComfyUI image pipelines

## EXPERIENCE

**MDS Pro Solutions - Full Stack Developer (Contract)** | Feb 2026 - Present

- Sole engineer on the timekeeping and billing platform used every workday by 15 people: TypeScript and Fastify API, Supabase / Postgres, and a Chrome extension staff clock in through.
- Built the admin dashboard (seven screens, live staff status over Postgres realtime) and the payroll and invoice workbooks, all generated from one shared pay calculation.
- Built and maintain the company site, mdsprosolutions.com, hand-coded on Vercel; local Lighthouse mobile from 83 to 93 with zero layout shift and 100 for accessibility.
- Made an 8-minute onboarding video in Remotion (React and TypeScript) on animated recreations of the real app screens, now live on the company site.
- Closed a database access hole that let any signed-in user read colleagues' billed rates, on a path the API's admin check never saw.

**Independent Full Stack Developer** | 2021 - Present

- kimlj.dev: hand-written HTML, CSS and JavaScript with no template, light and dark themes, reduced-motion support and phone layouts reworked section by section. Live demos: https://kimlj.dev/hub.

## PROJECTS

**WordWarz.io - Web, iOS and Android App** | React, Capacitor, Node.js, Socket.IO

- Real-time multiplayer game designed and built solo, live in the browser and on the App Store and Google Play; 570 players since launch, with 40 to 70 playing on a given day.
- Separate phone, tablet and desktop layouts checked by a CI-gated Playwright suite; owned the store builds and review through Codemagic. 60+ avatars from my own ComfyUI pipeline.
- Fixed an App Store submission blocker where account deletion failed for some players, and supplied the review notes, walkthrough video and screenshots for resubmission.

**RecodeAI - AI Website Redesigner** | Next.js, Claude API

- Crawls a site, works out its brand with Claude, generates a redesign and deploys it to a live URL, streaming each step to the screen. Live at recode.kimlj.dev.

**DailyLoad - React Native App (in development)** | Expo, React Navigation, Zustand

- Onboarding and tab flows, local SQLite data, and health data from iOS HealthKit and Android Health Connect.

**Cockpit - AI Coding Workflow** | Not public yet

- Built on DeepSeek Harness: Claude Code or Codex builds, automated tests check, a read-only agent reviews, then I approve. Live walkthrough and commit history available; film at kimlj.dev/cockpit made by Claude Code.

## EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
