KIM JULONGBAYAN

Mobile Developer | React Native, Expo & iOS/Android Releases

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Full Stack Developer with 5+ years of on-and-off software experience, React Native/Expo project work and a React/Capacitor app released on iOS and Android.
- Own mobile interfaces, APIs, testing and store releases; maintain a business-management platform used daily by 15 people. Demos: kimlj.dev/hub

TECHNICAL SKILLS

- React Native, Expo, React, JavaScript, TypeScript | React Navigation, Zustand, Reanimated, SQLite | REST APIs, JSON, Supabase Auth, Apple/Google OAuth
- TestFlight, App Store Connect, Google Play Console | Codemagic, Xcode/CocoaPods cloud builds, Gradle | Git, GitHub Actions, Playwright, Sentry
- Node.js, Fastify, PostgreSQL | HealthKit, Android Health Connect | Android emulator tooling | MacBook with a cloud Mac as backup

MOBILE PROJECTS

DailyLoad - React Native Fitness Application | In development

- Built the Expo/TypeScript app with React Navigation, Zustand and Reanimated; implemented onboarding/tab navigation and SQLite-backed profile data.
- Implemented platform-specific health permission and read paths for iOS HealthKit and Android Health Connect, with locally stored health data.

WordWarz.io - Released iOS, Android and Web Application | React + Capacitor

- Built the React app and Node.js multiplayer backend; released Word Warz: Royale on the Apple App Store and Google Play.
- Managed Codemagic iOS builds, TestFlight distribution and App Store Connect review submissions; fixed signing failures with uploaded identities/profiles.
- Fixed account deletion for users with Practice history before App Store resubmission; supplied review notes, a walkthrough video and screenshots.
- Built signed Android bundles with Gradle and managed internal/closed testing and production promotion in Google Play Console.
- Built Android emulator tooling for install, launch, screenshots and device logs; configured Sentry monitoring across client and server.
- Added a CI-gated Playwright suite against a release build and isolated database, checking a real two-player match and device layout selection.

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on the TypeScript/Postgres timekeeping and billing platform used daily by 15 people: staff extension, APIs, admin dashboard and exports.
- Protected confidential production data with row-level permissions, append-only time entries, attributed corrections and encrypted off-site backups.
- Connected billing to Google Sheets while preserving manual figures; payroll and client invoices use one calculation to agree to the cent.

OPEN SOURCE

- Merged fixes and regression tests into recharts and mastra, each with over 27,000 GitHub stars; each reviewed by an upstream maintainer.

EDUCATION

- BS Information Technology coursework, AMA Computer College Makati: 3 of 4 years completed; degree not conferred.
