KIM JULONGBAYAN

Website Developer | Responsive Websites, Forms & Integrations

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Website developer with 3 years of professional software development experience. Builds responsive websites, forms, integrations, and business tools from implementation through release and support.
- Sole engineer on a US healthcare staffing platform used every workday by 15 people; also built the company's public website. Work samples at kimlj.dev/hub.

SKILLS

- Websites: HTML, CSS, JavaScript, React, TypeScript, Next.js, responsive layouts, landing pages, mobile performance
- Forms and integrations: server-side validation, email routing, REST APIs, Google Sheets API, Apps Script, webhooks
- Business systems: PostgreSQL, Supabase, role-based access, billing and payroll workflows, Excel reporting
- Delivery: Git, automated checks, technical documentation, Vercel, Docker, Linux VPS

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Build and maintain the public website and internal timekeeping and billing platform for a US healthcare staffing business; work directly with the US owner.
- Built mdsprosolutions.com in HTML, CSS, and JavaScript, with responsive phone layouts, service content, booking forms, and nurse applications.
- Route booking requests to sales and applications to HR, with server-side validation, spam protection, and confirmation emails to the sender.
- Improved mobile loading through critical CSS, deferred scripts, responsive images, and paused offscreen animations; local Lighthouse mobile score increased from 83 to 93.
- Built the staff interface and admin dashboard for 15 daily users, with live status, timesheets, payroll, client invoices, and approved corrections.
- Automated billing into the owners' Google Sheet; fills blank cells and flags mismatches rather than overwriting figures entered by a person.
- Generate timesheets, payroll, and invoice workbooks from one shared calculation; protect production patient information with role-based access and encrypted backups.

Independent Software Developer | 2021 - Present

- Build and maintain independent web, mobile, and automation projects, owning architecture, implementation, testing, deployment, and ongoing fixes.

PROJECTS

Portfolio and Product Walkthroughs

- Built the portfolio in HTML, CSS, and JavaScript, with responsive layouts, light and dark themes, accessible motion settings, and interactive product walkthroughs.

WordWarz.io - Web and Mobile Product

- Built a React web application with distinct phone, tablet, and desktop layouts; released on the web, App Store, and Google Play.
- Added discovery landing pages, metadata, structured data, and referral tracking; automated browser checks cover a real two-player match and the device-layout split.

RecodeAI - Website Redesign Pipeline

- Built a Next.js application that reads a website, analyzes its brand with Claude, generates a redesign, and deploys it to a URL with progress streamed to the user.

EDUCATION

- {'BS Information Technology coursework, AMA Computer College Makati': '3 of 4 years completed; degree not conferred.'}
