

KIM JULONGBAYAN

Front-End Developer | React, TypeScript | Claude Code

Quezon City, Metro Manila, Philippines | kljulongbayan@gmail.com | +63 961 529 9305
Portfolio: kimlj.dev | GitHub: github.com/kimlj | LinkedIn: linkedin.com/in/kimjulongbayan

PROFESSIONAL SUMMARY

- Developer with 5+ years building web software end to end, React by default, and the sole engineer on an operations platform 15 people use every workday. 4 pull requests merged into recharts, a React charting library with 27,000+ stars.
- 834 hours building with Claude Code (as of Oct 2026), counted from session logs and published at kimlj.dev, reviewing every change before it ships.

TECHNICAL SKILLS

- Front end: React, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Zustand, Vite, responsive and mobile-first layouts, Capacitor (iOS), Chrome extensions
- Back end and APIs: Node.js, Express, Fastify, Socket.IO, REST APIs, webhooks, PostgreSQL, Supabase, Google Sheets API
- AI coding tools: Claude Code, Codex, ChatGPT; AI features on the Claude API and OpenAI API
- Workflow: Git, GitHub, pull requests and code review, Playwright, GitHub Actions, Vercel, Docker, Linux server

EXPERIENCE

MDS Pro Solutions - Full Stack Developer (Contract) | Feb 2026 - Present

- Sole engineer on the timekeeping, payroll and invoicing platform a US nursing company runs on (TypeScript, Fastify, Supabase/Postgres), used every workday by 15 people.
- Built the admin dashboard: seven screens over 6,000+ lines of JavaScript, with each nurse's status updating live, no refresh.
- Built the Chrome extension side panel the nurses clock in and out of, published on the Chrome Web Store.
- Added Ask AI, an assistant on the Claude API that answers the owner's questions from the database through a read-only account, with the cost of every question recorded.
- Generated timesheet, payroll and invoice workbooks from one shared pay calculation, so every screen and file agrees to the cent.
- Built the public site, mdsprosolutions.com, on Vercel, with an AI chat assistant.

Independent Developer | 2018 - Present

- Built and shipped web, mobile and automation projects end to end: design, code, deployment and upkeep.

PROJECTS

WordWarz.io - Real-Time Multiplayer Word Game | React, Node.js, Socket.IO

- Live in the browser and on the iOS App Store from one React code base: 570 players have reached a game across 1,045 matches, with 40 to 70 playing on a given day, grown by word of mouth alone.
- Wrote a Playwright suite that plays a real match across two browsers against a fresh game server, beside 584 server tests.

RecodeAI - AI Website Redesigner | Next.js, Claude API

- Crawls a site, analyzes its brand with Claude, generates a redesign and deploys it to a live URL, with progress streamed live to the browser.

OPEN SOURCE CONTRIBUTIONS

- recharts, a React charting library with 27,000+ stars (4 merged): XAxis height="auto" sizing with its docs example, a connectNulls bug across stacked areas, and a redundant state update in CartesianAxis. Each reviewed by a maintainer.
- mastra, an AI agent framework with 28,000+ stars (1 merged): agent retries now wait as long as a rate-limited provider asks instead of retrying straight away.
- OpenAI Codex CLI (127,000+ stars): traced a Windows bug to two lines of its Rust source. The maintainer credited the trace, and the shipped fix changed those two lines.

EDUCATION

- Bachelor of Science in Information Technology, AMA Computer College Makati (3 of 4 years completed)
